

SCHOOL friends

The Group

Siggi Group dresses children who attend primary and infant schools with high-quality smocks. Clothing suitable for school environments, easy and practical in maintenance for parents and comfortable for children even in moments of play and leisure.

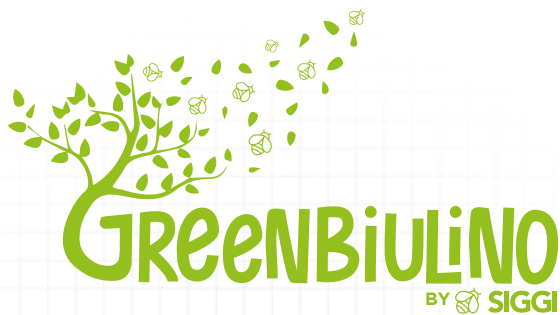

An all-Italian creativity to dress the will to do at school!

Integrated management system

Siggi's Management System is certified from an integrated perspective according to the UNI EN ISO 9001 standards for quality and process optimization, UNI EN ISO 14001 for the environment and eco-sustainability, UNI EN ISO 45001 for safety and health in the workplace and SA 8000 for Social Responsibility and ethics.

The First GREEN & SAFE smock

The need to educate ourselves to a more correct and attentive behavior towards the environment has made us make choices that strongly characterize Siggì's proposal. We do not follow a trend, but we get involved so that Respect for Nature becomes not just a message, but a concrete action. The "Greenbiulino" is the first GREEN and SAFE smock!

Recommended by pediatricians

We sought an authoritative opinion supporting what we have been doing for more than 50 years: smocks for school and kindergarten. A survey conducted in collaboration with the National Observatory on Child and Adolescent Health (Paidòss) was carried out on the use of smocks at school; it involved 1,050 pediatricians throughout Italy. At the end of the interviews and data processing, we could confirm the validity of the use of the smocks in school environments. The investigation revealed that doctors consider the smock an excellent protection for children and consider it an indispensable ally for their school activities.

91% of pediatricians say that the smock promotes a sense of belonging to the group

86% of pediatricians claim that the smock is hygienic and favors the personal hygiene of the little ones, increasing protection from viruses and diseases

91% of pediatricians argue the smock protects clothes from stains, tears and other damage
